Varian Pharmed Company started its activity on a research platform in 2009 by taking advantage of the high scientific ability of its members. Manufacturing pharmaceutical products with a high level of knowledge and the latest technology in the world, yet at a competitive price has always been on the agenda of this company. After United States of America, this company is known as the second pharmaceutical company with In Situ Forming technology in the world. This system is one of the most advanced modern methods for delivery of medicine.

By patenting the triptorelin acetate with In Situ Forming technology, Varian Pharmed is the first and the only manufacturer of this medicine with this type of technology in the world, an achievement which is still honorable as a golden leaf in the company's treasury of achievements. By taking advantage of the high capabilities of its human resources, this company not only has the ability to meet the country's pharmaceutical needs, but also has the possibility of exporting pharmaceutical products and even know-how to other countries.

Varian Pharmed Company is a knowledge-based company that has sprouted, grown and flourished on the basis of science and knowledge and this has doubled our responsibility towards the health of the global community, because we consider ourselves to be amongst the pioneers of development and innovation.

Arian Salamat Sina Company started its activity in 2009 as one of the innovative and leading companies in the field of medicine and supplement industry. The culture of promoting knowledge and learning in the organization, along with the transfer of the latest scientific achievements from international partners such as Holistica from France and Tradapharma from Switzerland, brought to the company, the ever-increasing growth and provided products with superior quality to the pharmaceutical market of the country as well as international community in order to promote the health and the quality of life for everyone. In order to achieve these idealistic goals, Arian Salamat Sina Company has always taken a step in the path of progress and development by installing and using modern equipment and relying on the diligent minds of the most experienced Iranian and foreign scientists.
